

Aviat Networks Awarded Approximately \$10 Million in U.S. Utility Business

April 8, 2019

Represents Orders Received in Q3 FY19 from Gas, Water and Electric Utilities in USA

MILPITAS, Calif., April 8, 2019 /PRNewswire/ -- Aviat Networks, Inc. (NASDAQ: AVNW), the leading expert in wireless transport solutions, today announced it has received orders worth approximately \$10 million in its FY19 third quarter from customers in the U.S. Utility segment. As with most of Aviat's recent Utility business, customers will deploy the Company's hybrid microwave radio solutions which ease the migration to IP/MPLS while preserving teleprotection and other critical Utility traffic.

Through the first nine months of FY19, Aviat has received orders worth over \$33 million in the U.S. Utility market, surpassing the orders obtained in this segment throughout all of FY18, with additional orders received since quarter end.

Some of the key highlights include:

- *\$1.5 million with a Texas-based electric cooperative.* This new customer will deploy the Company's Eclipse IRU 600 EHP microwave radio along with ProVision management platform and will depend on Aviat for factory services for the pre-staging and configuration of the entire solution.
- *\$1 million with a Colorado energy cooperative.* This company will upgrade its legacy base of Aviat radios with the Company's Eclipse IRU 600 EHP and full turnkey services to support the delivery of energy to rural communities in Colorado.
- *45 other utility accounts.* Beyond the larger wins, the rest of the business in the period came from approximately 45 utility customers across the U.S.

"Utility communications networks continue to be a key part of the protection and seamless operation of critical gas, water and electric infrastructure across the country and around the world," states Michael Pangia, president and CEO, Aviat Networks. "As is evident by our bookings through the first three quarters, demand for mission critical communications in the Utility segment continues to grow and we are well positioned given our strong, proven value proposition for these customers."

About Aviat Networks
