

Aviat Networks and Intracom Telecom Partnership Delivers Fixed Wireless Access (FWA) Solutions

September 29, 2025

Aviat will address the growing need for multi-Gigabit 5G access use cases in North America with a complete solution portfolio

AUSTIN, Texas, Sept. 29, 2025 /PRNewswire/ -- Aviat Networks, Inc. (NASDAQ: AVNW), the expert in wireless transport and access solutions, today announced a partnership with Intracom Telecom, a global technology systems and solutions provider, to deliver Fixed Wireless Access (FWA) technology that leverages the high-capacity 28 and 39 GHz millimeter wave (mmWave) bands, conforming to FCC requirements for mmWave bands intended for 5G use.

Aviat will initially focus on select North American service providers to address the growing need for multi-Gigabit consumer and enterprise 5G use cases as an alternative to the high cost, delays and complexity of using fiber, but with fiber-like performance. In addition, Aviat will offer software solutions along with a comprehensive set of design, planning, deployment and support services thanks to its extensive presence in North America.

Intracom Telecom's WiBAS G5 platform is the only commercially available point-to-multipoint FWA solution operating in the 28 and 39 GHz mmWave bands that can address the growing demand for high-capacity Fixed Wireless Access, cost effectively delivering over 22Gbps from the same base station site, using Multi-User MIMO and Hybrid Massive Beamforming, over distances of up to 5 miles and more.

"We are very excited at this significant opportunity to extend our wireless expertise to provide advanced mmWave FWA solutions," Pete Smith, CEO of Aviat Networks said, "Wireless can be deployed rapidly and cost effectively, and is perfectly suited to support high speed connectivity combined with excellent reliability."

"I am very proud of Intracom Telecom's R&D team for creating a solution that sets a new benchmark for FWA. Through this strategic partnership with Aviat Networks, we're excited to help U.S. operators accelerate broadband expansion and deliver a true multi-gigabit experience, and more, over wireless," said Kartlos Edilashvili, CEO of Intracom Telecom.

About Aviat Networks

Aviat is the leading expert in wireless transport and access solutions and works to provide dependable products, services and support to its customers. With more than one million systems sold into 170 countries worldwide, communications service providers and private network operators including state/local government, utility, federal government and defense organizations trust Aviat with their critical applications. Coupled with a long history of microwave innovations, Aviat provides a comprehensive suite of localized professional and support services enabling customers to drastically simplify both their networks and their lives. For more than 70 years, the experts at Aviat have delivered high performance products, simplified operations, and the best overall customer experience. Aviat is headquartered in Austin, Texas.
