Aviat Networks to Demo CTR 8380 Live at AfricaCom

All-Outdoor Microwave Router Lowers Cost, Improves Network Flexibility

SANTA CLARA, Calif., Nov. 10, 2015 /PRNewswire/ -- Aviat Networks, Inc. (NASDAQ: AVNW), the leading expert in microwave networking solutions, will demonstrate CTR 8380, the new all-outdoor microwave router, at AfricaCom 2015 in Cape Town, South Africa, Nov. 17-19, 2015. CTR 8380 converges IP/MPLS and microwave functions in a single, compact device for all-outdoor deployments. It is the only outdoor router with integrated microwave radio link optimization capability.

CTR 8380's zero-footprint design lowers site costs by eliminating need for shelters or cabinets, reducing air conditioning requirements, decreasing power and fuel consumption. Its compact design is also ideal in rooftop for delivering macrocell, small cell and enterprise connectivity. As a router, CTR 8380 extends IP/MPLS to the cell site, improving network scalability and enabling new IP-based VPN services. With microwave and router integrated in one box, operators do not have as many devices to buy, deploy and maintain—critical for all-outdoor deployments.

To request a demo of the CTR 8380 all-outdoor microwave router, email marketing@aviatnet.com. Then visit Aviat Networks at Booth B10 at the Cape Town International Convention Centre.

About Aviat Networks

Aviat Networks, Inc. (NASDAQ: AVNW) is a leading global provider of microwave networking solutions transforming communications networks to handle the exploding growth of IP-centric, multi-Gigabit data services. With more than one million systems sold in over 140 countries, Aviat Networks provides LTE-proven microwave networking solutions to mobile operators, including some of the largest and most advanced 4G/LTE networks in the world. Public safety, utility, government and defense organizations trust Aviat Networks' solutions for their mission-critical applications where reliability is paramount. In conjunction with its networking solutions, Aviat Networks provides a comprehensive suite of localized professional and support services enabling customers to effectively and seamlessly migrate to next-generation Carrier Ethernet/IP networks. For more than 50 years, customers have relied on Aviat Networks' high performance and scalable solutions to help them maximize their investments and solve their most challenging network problems. Headquartered in Santa Clara, California, Aviat Networks operates in more than 100 countries around the world. For more information, visit www.aviatnetworks.com or connect with Aviat Networks on Twitter, Facebook and LinkedIn.
