

Harris Stratex Networks Enters into Turnkey Contract with Uninor for Transmission Microwave Solutions

RESEARCH TRIANGLE PARK, N.C. – January 27, 2010 – Harris Stratex Networks, Inc. (NASDAQ: HSTX), a leading provider of wireless solutions that enable the evolution of next-generation fixed and mobile broadband networks, today announced it has signed a contract with Uninor – the joint venture of the Telenor Group and India's Unitech Ltd. The contract is all-inclusive, incorporating supply, install, commission and maintenance services, as well as the backhaul and access microwave links. Under the five year contract, Harris Stratex will supply its latest state-of-the-art Eclipse platform microwave solution to meet both TDM and IP backhaul requirements.

Telenor Group entered the Indian mobile market through Uninor – its joint venture with India's Unitech Limited. Uninor has license to operate 2G services across all 22 telecom regions in India. The company has already launched its services in eight telecom regions and is looking forward to launch services in additional regions in early to mid 2010.

“Over the next year, Telenor Group will experience an explosive rate of growth in India, which began with the largest single day launch in telecom history, and a service footprint covering almost 600 million people,” said Harald Braun, president and chief executive officer of Harris Stratex Networks. “Harris Stratex is proud to help enable this coverage with our industry-leading Eclipse platform, and world-class service and support.”

Eclipse is the most comprehensive wireless backhaul solution available, enabling optimized transport of all types of traffic, from low-capacity PDH to high-capacity SDH/SONET or Gigabit Ethernet. It offers innovative features such as Super-PDH nodal networking, delivering high-end performance at lower overall cost of ownership. For more information, please visit www.harrisstratex.com.
